

## PLANNERS GET LAW WHICH STATES POWER

Members of Zoning Board Arrive for Study on How to Regulate Outlined Districts.

Due to an oversight in sending notices T. B. Reidy was the only member of the city planning commission other than the regular city officials to attend the January meeting of the planning commission at the city hall yesterday afternoon.

As members who were to make important reports were not present the meeting was adjourned after a short discussion of various matters until the third Tuesday in February.

Mr. Reidy gave as his opinion that if the planning commission is to perform some good for the community a system of work must be settled upon soon or the commission might as well disband.

Told Legal Standing.

Commissioner Martin T. Rudgren gave out copies of the Illinois state zoning law, which he was requested to obtain in instructions given at the last meeting of the commission.

This law sets forth the legal standing of such a commission in the stipulation that no zoning plan can be adopted until regularly constituted municipal authorities take the matter before such a commission for a public hearing. All property owners in a proposed zoning district must be given notice of such a hearing in order to give them an opportunity to register any protest they might have.

The law stipulates that no zoning district shall be named unless the majority of the property owners in such a district favor the proposition. In case a zoning system is decided upon and is provided for in an ordinance adopted by the city planning commission is automatically given considerable authority in working out details of operation of the system.

Purpose of System.

The purpose of the zoning law is to provide for the laying out of zones in which matters will be regulated.

Robust Children

A child should not look pale, thin or worn. Such condition denotes malnutrition. To keep up growth and robustness a child needs a plenitude of food rich in vitamins.

Scott's Emulsion

Abundant in growth-promoting properties, is an ideal supplemental food that could well be a part of the diet of every growing child.

Children always do well on Scott's Emulsion.

## ASK REPORTS OF BIRD STUDENTS

Illinois Audubon Society Wants Data from Ornithology Lovers for Publication.

Bird lovers of Rock Island and vicinity are asked to give aid to the Illinois Audubon society in accumulating data and in compiling ornithological material for the society's publication, in a letter just received by E. C. Fisher, superintendent of schools, from Jesse L. Smith of Highland Park, vice president of the organization.

Mr. Smith wishes to get into communication with bird lovers throughout the state. His primary aim is to obtain material for the mid-winter bulletin of the Audubon society concerning bird migrations and special phases of bird study.

In particular, he requests the following: Reports from observers as to the whereabouts of birds wintering in different areas of Illinois, as the pine grosbeak, the evening grosbeak, the lapland longspur, pine siskin and northern shrike; the migration of the Bohemian waxwings, of which a study is being made in the Chicago area; reports on bird propaganda or the lack of it in the community.

The above data will be included in an article to appear in the bulletin on the occurrence of winter birds in Illinois, which is to be brought up to the time of going to press of the bulletin, Feb. 15.

Besides desiring the names of individuals interested in ornithological investigation, Mr. Smith asks timely reports from schools and clubs of work along these lines. He suggests topics which might be included in these reports: Experiences with bird houses; nesting records of all kinds; reports of activities of wardens, constables, police officers, etc.; reports upon areas where law enforcement is very much needed; suggestions as to how to secure the cooperation of officers of the law; notes upon the bird life of the given area during the last year; activities in the woods; bird lectures.

Want Report of Bird Laws.

Other articles to be included in the bulletin are to deal with last year's campaign to secure a revision of the bird protection laws, and an account of what has been done to enforce the laws and regulations in the state. Experiences that bird lovers in the state have had

ARE YOU TIRED, WEAK, NERVOUS AND WORRIED?

Do you "hate" to get up in the morning? Do you always feel tired out? Do you feel weak and nervous, but not sick enough to go to a doctor?

If your blood is healthy you should sleep like a child and wake up in the morning bright and cheerful, thoroughly refreshed and full of energy for the day's work.

Science has proved that the body is only a collection of cells and that Nature requires twelve cell-salts to keep the cells of the body in perfect health.

It has been demonstrated that these cell-salts not only build, nourish and repair the cells, but govern the health and vitality of the tissue, nerve, blood, bone and brain, of which the cells are a part.

Exhaustive laboratory tests and the clinical experience of many years have demonstrated that the health of the human body depends entirely upon the Red Blood Cells which carry in their hemoglobin the oxygen that is absolutely essential to human life.

These cell-salts attract and retain the oxygen as it passes from the lungs into the blood, and by their presence in the cells repair, nourish, revitalize and maintain the vigor, vitality, health and energy of the cells, of the blood, tissues, nerves, veins, arteries, bones, muscles and brain.

For many years Dr. A. L. Reusing has conducted an exhaustive series of experiments in his chemical laboratory to combine the phosphates of calcium, sodium and iron with the phosphates of potassium

The Illinois Audubon society was established in Chicago in 1897. Its particular aim is the conservation of bird life. Orpheus M. Schantz of Chicago is its president.

Any who can assist it in the way of contributing articles, data or reports of observations of bird life are requested to write to Jesse Lowe Smith, Highland Park.

**How Much Tobacco Will My Heart Stand**

A Question Vital to Every Man Who Smokes or Chews

IT MAY COST A PRECIOUS LIFE TO FIND OUT BY EXPERIMENT.

The heart of every user of tobacco bears a double burden. It does its allotted task and then fights nicotine for supremacy. As long as the heart wins he lives; when it loses he dies, but before the final victory of nicotine he passes through many stages of decline and decay and suffers many pains. Heart is like human beings—some are stronger than others, therefore some hearts will stand more tobacco than others, but there is a limit to what any heart can stand. The man who puts this additional strain on his heart a dozen times a day by smoking cigarettes, a pipe or cigars—or chewing tobacco—is taking a madman's chance with health and life to lose and nothing to win but the chance that he may not lose them. He is indulging in a costly habit at the expense of precious health. Ask any doctor anywhere, and he will tell you that using tobacco is injurious and that it is far better to quit the habit than to experiment to find how much tobacco your heart will stand without serious results.

But the thought of quitting is unpleasant to most men—even to those who know that tobacco injures them—and to really quit takes more will power than they have and causes more suffering than they can voluntarily endure. To quit the habit make it easy for yourself by getting Nicotol tablets and taking them as directed. The habit really quits you and its departure is a pleasure equal to its indulgence.

If you want to know how much easier it is to quit the habit with Nicotol than without it, go twenty-four hours without tobacco and note what an effort it costs you, then begin using it as usual and take Nicotol tablets. At the end of a week discontinue smoking or chewing for a day and it is probable you will have no desire to resume. At least your desire will be greatly diminished and another week or two should make it not only possible, but a pleasure, to quit.

NOTE: Dr. Connor, formerly of Johns Hopkins Hospital, under whose advice Nicotol has often been used, said when this statement was shown to him: "I have known Nicotol to conquer the tobacco habit in less than ten days, time and I can therefore recommend it highly." When the doctor's statement was shown to one of our leading druggists he said: "Nicotol is truly a wonderful remedy for the tobacco habit, way ahead of anything we have ever sold before. We are authorized by the manufacturers to refund the money to every dissatisfied customer and we would not permit the use of our name unless the remedy possessed unusual merit." Nicotol is sold in this city under an iron-clad money-back guarantee by all up-to-date druggists, including John Bengtson.

## Buy Your Fordson Tractor Now

Now is the logical and safe time to buy your Fordson Tractor. Ford tractor manufacturers know that more machines will be wanted during this coming year than can be supplied. This is particularly true in regard to the Fordson. Its popularity has created a demand that makes it certain that some farm owners, desirous of obtaining the Fordson, must be disappointed.

Get your order in early. Make sure of getting the Fordson on your farm quickly so that you may become thoroughly familiar with its operation and be able to use it to the best advantage right at the beginning of your Spring work.

The Fordson is all that you expect of Simple to operate, compact, strong, light (weighs only 2,000 pounds), powerful, economical (operating on kerosene), long lived—it has upheld the Ford name among 8,000 owners.

You can depend on it to handle two 24 in. bottoms in any soil. And on the belt you won't find a better power outfit. Delivering between 20 and 22 horse power at the pulley, it will run your grain separator, hay baler, ensilage cutter—will, in short, handle all the best jobs you have to do within its rating.

And remember that behind the Fordson is Fordson Service—the help and advice that our tractor experts will give you on request—the stocks, parts and repairs that we keep ready for immediate delivery to your farm when you telephone. No waiting for slow mails or express service.

Built to meet actual farming conditions everywhere—proved under every existing condition throughout the country.

## SPRING IS DRAWING NEARER

As evidence we point to the ever increasing number of people who come in daily to place their orders for FORD cars. They must have seen the garden seed advertisements in the national magazines, and it has dawned upon them that Spring is really on the way.

But, of course, Spring would not be Spring without a FORD car, so they are coming in now and placing their orders, knowing full well that if they put off ordering they will not have a FORD car to enjoy in the Spring.

These people have played safe. They will get their cars by Spring. But those who do not place an order P. D. Q. are going to lose out as far as getting a FORD in the Spring is concerned. They can get one later in the summer, maybe, but not in the Spring.

What are you doing? Have you placed your order? If not, get under the wire at once. Play safe.
